

Indy says...

## It's time for Fall Wellness!

Sadly, all good things must come to an end – including Summer! The good news is that Fall is a wonderful time to enjoy your horse(s), with the decrease in flying pests, parasites, hot humidity, and busy camp schedules. Whether your and your horse(s) are preparing for a potentially cold winter, or a sunny get-away, this Fall checklist should be used to review all of your horse's healthcare needs. Most visits are performed in September, October, November, with the exception of some horses that will be transporting South for the Winter, in which case most visits are made closer to the December get-away.

### FALL CHECKLIST

- Vaccinations
  - Dependent on individual health and circumstances
- Dentistry – teeth should be checked every 6-12 months
- Bloodwork
  - Lyme, EPM, Cushing's (seasonally dependent)
- Fecal exams
  - Check out our deworming protocol
- Wellness exam
  - Preventative medicine is better than treatment!
